VACANCY DETAILS

Job title	Data Scientist
Number of posts	3
Full job description Are you a fan of SQL, Python, programming language R, Data Science and Machine Learning? Our experienced and international team is expanding in support of variety of exciting and innovative projects. As a member of the Data Analytics Team of Deutsche Telekom Services Europe, you will be at the forefront of innovation in variety of functional areas.	
Which challenges are expecting you:	
<ul style="list-style-type: none">• you will be in search for optimizing the business and business processes with the power of data• implementation of process analyses and act as an interface to our customers• the chance to analyse data and identify possible use and application cases of data analytics• cooperation with business (regular meetings and calls with internal customers regarding their needs), so the ability to explain technical stuff to business colleagues is crucial part of this job• you will have the opportunity to work with variety of data mining and data analytics tools• you will actively take part and contribute in customer workshops	

- we offer opportunities to grow and develop yourself (predictive analytics using Python / R and advanced analytics use cases where statistical methods such as regression, classification and clustering are used)

Your skills:

- first working experience in Big Data, Data Science, Machine Learning and Artificial Intelligence
- excellent English, ideally also Czech and/or German
- you are OK with coding in Python and/or R
- you shall follow current trends in data analytics market
- we work with Salesforce, SAP and SAP HANA studio - experience with these tools is more than welcome
- IT area sounds good to you, but business process management is something that seems to be interesting too (Procurement, Finance, Human Resources experience)
- you are aware of and willing to apply Agile methodology (Scrum, XP, Kanban etc.)
- you are an analytical thinker, have an affinity for structure, grasp things fast and work systematically
- you are a team player, open for international environment and be able to travel occasionally within Europe
