

1. TITLE OF THE CERTIFICATE (ES)

**Certificado de Profesionalidad de nivel 3 en
 ELEEE0310 GESTIÓN Y SUPERVISIÓN DEL MONTAJE Y MANTENIMIENTO DE INSTALACIONES ELÉCTRICAS EN EL
 ENTORNO DE EDIFICIOS**

2. TRANSLATED TITLE OF THE CERTIFICATE (EN)

**Professional Certificate Level 3 in
 ELEEE0310 MANAGEMENT AND SUPERVISION OF INSTALLATION AND MAINTENANCE OF ELECTRICAL INSTALLATIONS
 IN BUILDINGS
 (This translation has no legal status)**

3. PROFILE OF SKILLS AND COMPETENCES

The holder of this certificate will have acquired the **general competence** to manage and supervise installation and maintenance of electrical installations in housing, industrial, office and commercial buildings with public traffic, premises with special characteristics and installations for special purposes based on a project or technical design, in accordance with set standards and expected quality, ensuring full safety and optimal operating conditions and environmental protection. This general competence is divided into the following **skills units** (UC):

- Organise and manage installation processes for electrical installations in buildings and for special purposes (UC1180_3).
- Supervise installation processes for electrical installations in buildings and for special purposes (UC1181_3).
- Organise and manage maintenance processes for electrical installations in buildings and for special purposes (UC1182_3).
- Supervise maintenance processes for electrical installations in buildings and for special purposes (UC1183_3).

The professional skills are acquired through the **learning outcomes** defined within the related Training Modules (MF):

- Organisation and management of installation of electrical installations in buildings and for special purposes (MF1180_3).
- Supervision of installation processes for electrical installations in buildings and for special purposes (MF1181_3).
- Organisation and management of maintenance processes for electrical installations in buildings and for special purposes (MF1182_3).
- Supervision of maintenance processes for electrical installations in buildings and for special purposes (MF1183_3).
- Practical training at the workplace in management and supervision of installation and maintenance of electrical installations in buildings (MP0307).

(See legal basis for all learning outcomes information acquired by the holder of this Certificate in each MF).

As a reference the learning outcomes include in the Practical training at the workplace that complete and reinforce the learning outcomes acquired in the other training modules, are:

- Programme and launch the installation plan for an electrical installation, based on the building's maps and technical documentation.
- Install and supervise a standard installation, in a housing, office, commercial or industrial building, following the launch plan for the installation.
- Programme and organise the maintenance plan for an electrical installation, based on the building's technical documentation.
- Repair breakdowns according to the corrective interventions report.
- Supervise safety and function tests for maintenance operations in electrical installations of buildings and for special purposes.
- Take part in the company's working processes, following the rules and instructions established at the workplace.

4. RANGE OF OCCUPATIONS ACCESSIBLE TO THE HOLDER OF THIS CERTIFICATE

The holder of this certificate may work in the areas of indoor installation and maintenance of low voltage (LV) electrical installations, in housing, office, commercial and industrial buildings, the activity being regulated by the Low Voltage Electrotechnical Regulations (REBT). The holder may also work in the electrical power generation and distribution sector in the installation and maintenance of: low voltage installations in housing buildings; installations in office buildings; installations in commercial buildings; installations in specific industry buildings; installations in buildings for a group of industries; installations in premises with special characteristics, installations for special purposes. The most pertinent occupations and positions are:

- Technical coordinator of medium and low voltage electrotechnical installations for buildings.
- Technician for the supervision, verification and control of electrotechnical equipment and installations. Works Foreman for electrotechnical installations.
- Team Manager of low voltage installers for buildings.

5. OFFICIAL BASIS OF THE CERTIFICATE

Name and status of the national/regional authority providing accreditation/recognition of the certificate

The Ministry of Employment and Social Security or the corresponding autonomous regional administration within the scope of its competence, in the name of the King. The certificate is valid throughout Spain.

Level of the certificate

The Professional Certificate Level 3 of the National Repertoire of Professional Certificates corresponds to level 4 of the International Standard Classification of Education (ISCED-P 2011).

The European Qualification Framework (EQF) level:

Grading scale/Pass requirements

The grading scale and pass level of the training modules are expressed on a scale of 0 to 10. The minimum score for a pass is 5 in every training module including a pass in the practical training at the workplace module.

The grading system is as follows:

- FAIL: 0 to 4.9
- PASS-SATISFACTORY: 5 to 6.9
- PASS-GOOD: 7 to 8.9
- PASS-EXCELLENT: 9 to 10

Access to next level of education/training

This Professional Certificate Level 3 gives access to Professional Certificate Level 3 within the same professional area and family.

For validation purposes, the educational authorities will recognise the professional module or modules of the VET diplomas corresponding to the skills units included in the training modules of this certificate.

Legal basis

Royal Decree 1523/2011 of 31 October, establishing ten professional certificates in the professional family Electricity and Electronics which are included in the National Repertoire of Professional Certificates.(Appendix VII Code: ELEE0310)

6. OFFICIALLY RECOGNISED WAYS OF ACQUIRING THE CERTIFICATE

This certificate may be acquired by:

1. Training: Completion with a pass grade of the face-to-face or online training programme.
2. Recognition of the professional skills acquired through professional experience or non-formal training (prior learning): Completion of a process of skills evaluation and accreditation in all the skills units making up the professional certificate.
3. Dual training: Completion of a training and apprenticeship contract, which may range from 1 year (or 6 months, if stipulated as such in the collective agreement) to 3 years, during which effective working time is combined with time dedicated to training under the training programme for the professional certificate.

The training method (number 1 above) requires successful completion of the training modules and the practical training at the workplace:

Description of vocational training received	Percentage of total programme (%)	Duration (hours)
Training modules	89	620
Practical training at the workplace	11	80
Total duration of training leading to the certificate		700

Entry/access requirements:

- *Bachiller* Diploma (upper secondary education); or
- Professional Certificate Level 2 in the same professional area.
- If neither of the above or higher certifications are held, a pass in the key skills tests.

Additional information: Professional certificates are instruments for official accreditation of the professional qualifications in the National Catalogue of Professional Qualifications for all economic activities, within the scope of the labour administration. The National Repertoire of Professional Certificates is divided into three qualification levels (Level 1, Level 2 and Level 3), and by sectors into 26 professional families and 102 professional areas.
