

1. TITLE OF THE CERTIFICATE (ES)

**Certificado de Profesionalidad de nivel 3 en
 ELEM0210 GESTIÓN Y SUPERVISIÓN DEL MONTAJE Y MANTENIMIENTO DE SISTEMAS DE
 AUTOMATIZACIÓN INDUSTRIAL**

2. TRANSLATED TITLE OF THE CERTIFICATE (EN)

**Professional Certificate Level 3 in
 ELEM0210 MANAGEMENT AND SUPERVISION OF INSTALLATION AND MAINTENANCE OF
 INDUSTRIAL AUTOMATION SYSTEMS
 (This translation has no legal status)**

3. PROFILE OF SKILLS AND COMPETENCES

The holder of this certificate will have acquired the **general competence** to manage and supervise installation and maintenance and conduct commissioning of regulation and control systems in industrial facilities, fulfilling quality criteria, under conditions of safety, environmental protection and in compliance with applicable regulations. This general competence is divided into the following **skills units** (UC):

- Manage and supervise installation of industrial automation systems (UC1575_3).
- Manage and supervise maintenance of industrial automation systems (UC1576_3).
- Supervise and conduct commissioning of industrial automation systems (UC1577_3).

The professional skills are acquired through the **learning outcomes** defined within the related Training Modules (MF):

- Management and supervision of installation of industrial automation systems (MF1575_3).
- Management and supervision of maintenance of industrial automation systems (MF1576_3).
- Commissioning of industrial automation systems (MF1577_3).
- Practical training at the workplace in management and supervision of installation and maintenance of industrial automation systems (MP0381)

(See legal basis for all learning outcomes information acquired by the holder of this Certificate in each MF).

As a reference the learning outcomes include in the Practical training at the workplace that complete and reinforce the learning outcomes acquired in the other training modules, are:

- Prepare programmes for installation, provisioning and maintenance of industrial automation systems, defining human and material resources, interventions to be carried out and sequencing based on information selected from technical documentation.
- Participate in management and supervision of installation and maintenance of industrial automation systems, based on quality plans and environmental protection conditions.
- Collaborate in installation and maintenance of equipment and elements of industrial automation systems, based on established procedures and technical documentation.
- Supervise and repair previously diagnosed breakdowns of industrial automation systems, using procedures, means and tools in safety conditions and with the quality required.
- Take part in the company's working processes, following the rules and instructions established at the workplace.

4. RANGE OF OCCUPATIONS ACCESSIBLE TO THE HOLDER OF THIS CERTIFICATE

The holder of this certificate may work in companies devoted to installing industrial automation equipment and systems, under the Low Voltage Regulation (LVR), as coordinator of installation/maintenance operators, in the areas of installation and maintenance of industrial automation systems. The holder may also work in all those business-production activities involving industrial automation processes, in the definition and development of projects for measurement and regulation and industrial communication networks. The most pertinent occupations and positions are:

- Team Manager for supervision of installation of industrial automation systems.
- Team Manager for supervision of maintenance of industrial automation systems.
- Verifier of electrical machinery, panelboards and equipment.
- Team Manager in an electromechanics workshop.
- Technician for maintenance organisation of industrial automation systems.
- Technician for commissioning of industrial automation systems.

5. OFFICIAL BASIS OF THE CERTIFICATE

Name and status of the national/regional authority providing accreditation/recognition of the certificate

The Ministry of Employment and Social Security or the corresponding autonomous regional administration within the scope of its competence, in the name of the King. The certificate is valid throughout Spain.

Level of the certificate

The Professional Certificate Level 3 of the National Repertoire of Professional Certificates corresponds to level 4 of the International Standard Classification of Education (ISCED-P 2011).

The European Qualification Framework (EQF) level:

Grading scale/Pass requirements

The grading scale and pass level of the training modules are expressed on a scale of 0 to 10. The minimum score for a pass is 5 in every training module including a pass in the practical training at the workplace module.

The grading system is as follows:

- FAIL: 0 to 4.9
- PASS-SATISFACTORY: 5 to 6.9
- PASS-GOOD: 7 to 8.9
- PASS-EXCELLENT: 9 to 10

Access to next level of education/training

This Professional Certificate Level 3 gives access to Professional Certificate Level 3 within the same professional area and family.

For validation purposes, the educational authorities will recognise the professional module or modules of the VET diplomas corresponding to the skills units included in the training modules of this certificate.

Legal basis

Royal Decree 1523/2011 of 31 October, establishing ten professional certificates in the professional family Electricity and Electronics, which are included in the National Repertoire of Professional Certificates. (Appendix X Code: ELEM0210)

6. OFFICIALLY RECOGNISED WAYS OF ACQUIRING THE CERTIFICATE

This certificate may be acquired by:

1. Training: Completion with a pass grade of the face-to-face or online training programme.
2. Recognition of the professional skills acquired through professional experience or non-formal training (prior learning): Completion of a process of skills evaluation and accreditation in all the skills units making up the professional certificate.
3. Dual training: Completion of a training and apprenticeship contract, which may range from 1 year (or 6 months, if stipulated as such in the collective agreement) to 3 years, during which effective working time is combined with time dedicated to training under the training programme for the professional certificate.

The training method (number 1 above) requires successful completion of the training modules and the practical training at the workplace:

Description of vocational training received	Percentage of total programme (%)	Duration (hours)
Training modules	82	530
Practical training at the workplace	18	120
Total duration of training leading to the certificate		650

Entry/access requirements:

- *Bachiller* Diploma (upper secondary education); or
- Professional Certificate Level 2 in the same professional area.
- If neither of the above or higher certifications are held, a pass in the key skills tests.

Additional information: Professional certificates are instruments for official accreditation of the professional qualifications in the National Catalogue of Professional Qualifications for all economic activities, within the scope of the labour administration. The National Repertoire of Professional Certificates is divided into three qualification levels (Level 1, Level 2 and Level 3), and by sectors into 26 professional families and 102 professional areas.
